Textora Bulk SMS & API Gateway

Terms of Service & Privacy Policy

Last Updated: January 2026

---

1. Terms of Service

Welcome to Textora. By using the Textora Bulk SMS conversational bot interfaces (Telegram & WhatsApp) or calling the Textora REST API gateway (collectively, the "Services"), you agree to be bound by these Terms of Service. If you do not agree to these terms, do not access or use the Services.

1.1. Description of Service

Textora provides high-speed bulk messaging broadcasts and SMS REST API gateway connectivity. All services are offered on a pay-as-you-go or prepaid balance credit basis. Textora reserves the right to modify, suspend, or terminate any part of its services at any time where reasonably necessary, including for maintenance,

security, legal or regulatory requirements, abuse, or violation of these Terms. Where reasonably practicable, Textora will provide prior notice of material changes or service interruptions.

1.2. Account Security & API Keys

- Developers are issued unique API Keys (txt_...) to access REST endpoints.
- You are solely responsible for maintaining the confidentiality and security of your API keys and credentials.
- Textora is not liable for any loss, damage, or unauthorized balance deductions resulting from compromised keys. If you suspect your key has been compromised, you must immediately regenerate it via the bot.

1.3. Acceptable Use Policy (AUP)

You agree to use Textora only for lawful purposes. You are strictly prohibited from using the Services to send:

- Spam, unsolicited marketing campaigns, or unauthorized promotional messages.
- Messages containing hate speech, harassment, threats, or defamatory statements.
- Content related to illegal activities, fraudulent schemes (e.g., phishing, mobile money scams), or deceptive practices.
- Unsolicited messages that violate national or international telecommunication laws, including the Electronic Communications Act of Ghana and NCA regulations.

Textora reserves the right to immediately suspend or permanently terminate any account or API key found violating this Acceptable Use Policy, without refund of outstanding balances.

1.4. Custom Sender IDs

- Users may request custom alphanumeric Sender IDs (up to 11 characters) for brand identification.
- Textora does not require a Letter of Authorization (LOA) to set up custom Sender IDs. However, you represent and warrant that you own or have the legal right to use the brand name requested.
- Textora reserves the right to reject or revoke any Sender ID that infringes on trademark rights, is misleading, or impersonates financial institutions, government bodies, or other corporations.

---

2. Payments, Billing & Refund Policy

2.1. Paystack Integration

All payments are processed securely via the third-party gateway Paystack. Textora does not store credit card or mobile money credentials on its servers.

2.2. Prepaid Credits

- API Developer balances are topped up in credit bundles (GHS 20.00 to GHS 5,000.00).
- SMS units are debited dynamically based on destination (1.0 credit per segment for Ghana numbers, 1.6 credits per segment for international destinations).
- All credit purchases are **final and non-refundable**. Credits have no cash value and cannot be redeemed for GHS or transferred to other accounts.

---

3. Privacy Policy

Textora is committed to protecting your privacy and securing your communication logs.

3.1. Information We Collect

To provide the SMS gateway services, we collect:

- **Profile Metadata**: Telegram/WhatsApp user IDs, usernames, and profile names.
- **Payment Records**: Paystack transaction references, amounts, and statuses.
- **Transmission Logs**: Timestamp, recipient phone numbers, message previews, segment counts, and credit debits.

3.2. Data Retention & Usage

- **Message Delivery**: We do not store the full content of SMS messages indefinitely. Message text is used strictly to execute delivery via the telephony carrier and is kept only in brief logging files for delivery verification and debugging.
- **API Log Access**: Developers can access their own transmission logs via the GET /api/v1/logs endpoint or the bot console. These logs are preserved to help you monitor usage and debug integrations.
- **No Data Selling**: Textora will never sell, lease, or distribute your personal metadata, recipient contact lists, or message histories to third parties.

---

4. Disclaimers, Limitation of Liability & Indemnity

4.1. No Warranty (As-Is)

Textora is provided on an "as-is" and "as-available" basis. Textora makes no warranties, express or implied, regarding gateway uptime, carrier delivery speeds, or the uninterrupted operation of the Telegram and WhatsApp bots. SMS delivery is dependent on external telecommunication networks and recipient device status.

4.2. Limitation of Liability

In no event shall Textora, its administrators, or owners be liable for any direct, indirect, incidental, special, or consequential damages (including, but not limited to, loss of profits, business interruption, or loss of data) arising out of the use or inability to use the Services, even if advised of the possibility of such damages.

4.3. Indemnification

You agree to defend, indemnify, and hold harmless Textora, its owners, and affiliates from and against any claims, liabilities, losses, damages, costs, and expenses (including legal fees) arising out of your breach of these Terms, your use of the API, or the content of the messages broadcasted through your account.
